HARPACTUS

Arpactus Jurine, 1807:192, junior homonym of *Arpactus* Panzer, 1805, and of *Arpactus* Panzer, 1806. Type species:

Arpactus formosus Jurine, 1807, designated by Shuckard, 1837:220.

Harpactus Shuckard, 1837:221. Emendation of *Arpactus* Jurine, 107. As noted by Pulawski (1985:59), Shuckard emended *Arpactus* on linguistic grounds, thus creating an available new name, with its own date and author (Articles 19 and 33.2). Since *Harpactus* is an emendation, it has the same type-species as *Arpactus* Jurine (Article 67.8).

Harpactes Dahlbom, 1843:147, junior homonym of *Harpactes* Swainson, 1837 (Aves), and of *Harpactes* Templeton, 1834 (Arachnida). Emendation of *Harpactus* Shuckard.

Dienoplus W. Fox, 1894a:548. Type species: *Dienoplus pictifrons* W. Fox, 1894, by monotypy.

Valid name for the genus: Pulawski, 1985.

Key: R. Bohart, 1980 (North America), Nemkov, 1996 (Russia and neighboring countries).

Review of biology: Kazenas, 2001b:220.
